Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James Heintz on January 26, 2005.

The application has been amended as follows:

- a. Claim 34, line 2, page 27: after the phrase "prompting an operator to repeat a sequence", add --displayed on a wayside signal device,--.
- b. Claim 40, line 10, page 28: change "a signals" to --a signal--.

Allowable Subject Matter

2. Claims 1-45 are allowed.

The following is an examiner's statement of reasons for allowance: A method and device for promoting operator awareness during operation of a train comprising: prompting an operator to enter a signal displayed on a wayside signal device.

The most relevant prior art is Adams (US 5,392,030). However, Adams discloses promoting operator awareness during operation of a train where an operator is prompted to enter a signal displayed interior a train where the signal is generated from a processor on a train.

Art Unit: 2636

The distinction between Adams and the disclosed invention is the source and location of the generated signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Adams (5,392,030) discloses promoting operator awareness during operation of a train where an operator is prompted to enter a signal displayed interior a train where the signal is generated from a processor on a train.

Sluis et al. (US 4,196,412) discloses a push button for an automobile operator to acknowledge that the automobile is approaching a train grade crossing.

Hungate (US 5,415,369) discloses transceivers disposed on railroad tracks and wayside signal devices that communicate when a train approaches a transceiver disposed on the railroad tracks.
